AC - Air Traffic Controller

Air Traffic Controller Sailors perform duties similar to civilian air traffic controllers and play a key role in the effective use of Naval airpower throughout the world in operational and training environments. Navy ACs are responsible for safely and effectively directing aircraft operating from airfields or the decks of aircraft carriers. They also control the movement of aircraft and vehicles on airfield taxiways and issue flight instructions to pilots by radio.

Standards for entry into the AC field are high, but once accepted into the field, Navy ACs enjoy a demanding and highly rewarding career. This is a five-year enlistment program.

WHAT THEY DO
- Controlling and directing air traffic at airfields and on aircraft carriers using radio, radar, and other signaling devices;
- Providing aircraft with critical information on other air traffic, navigation systems, and airfield conditions essential to safe operations;
- Operating and adjusting computer-based ground/carrier-controlled navigation and radar approach systems;
- Interpreting data shown on radar screens and plotting aircraft positions;
- Maintaining aeronautical charts and maps.

CAREER PATH AFTER RECRUIT TRAINING
Enlisted Sailors are taught the fundamentals of this rating through on-the-job training or formal Navy schooling. Advanced technical and operational training is available in this rating during later stages of career development.

</table>

Following "A" school, Air Traffic Controllers spend one to two years gaining additional skills through on-the-job training at their first duty station. This consists of additional lab, lecture, and individual training leading to certification at an airfield facility. ACs are stationed in traffic control centers on aircraft carriers or at air traffic control facilities in the United States or overseas. During a 20-year period in the Navy, ACs spend approximately 30 percent of their time assigned to fleet units and 70 percent to shore stations; many of the shore stations may be located overseas.

WORKING ENVIRONMENT
ACs usually work in clean, office-like environments at naval air stations and onboard aircraft carriers. They work closely with others, are closely supervised, and do mostly mental work.

OPPORTUNITIES
The opportunities to enter the AC rating are excellent for qualified candidates. Currently, about 2,500 men and women work in the AC rating.

QUALIFICATIONS & INTERESTS
Applicants for the AC rating must be at least 18 years old and must pass a flight physical prior to entering "A" school. The ability to speak clearly is essential in this rating. Applicants must have no speech impediment and be able to clearly speak English. Applicants will be required to pass a Read-Aloud test as part of their flight physical. Applicants must be U.S. citizens eligible for a security clearance and have no history of drug abuse (no waivers permitted). Normal hearing and normal color perception are required. Vision must be better than 20/200 and correctable to 20/20.

Applicants should have an interest in aviation and working with or around aircraft. They should prefer to do detailed work and work as a team member. Applicants should have a good memory and should be able to perform quick mental math calculations. They should be comfortable with computers and with graphical orientations such as on maps or charts.
MANAGE A NAVY CAREER WITH NAVY LADR

EARN COLLEGE CREDIT
The American Council on Education recommends that semester hour credits be awarded in the vocational certificate and lower-division bachelor’s / associate’s degree categories for courses taken in this rating on word processing or data entry applications and office management procedures. See the college credits available via a Joint Services Transcript for this rating:

EARN DEPARTMENT OF LABOR (DOL) NATIONALLY RECOGNIZED APPRENTICESHIPS
The United Services Military Apprenticeship Program (USMAP) is a formal military training program that provides active duty and Full Time Support (FTS) Service members the opportunity to improve their job skills and to complete their civilian apprenticeship requirements while they are on active duty. The U.S. Department of Labor (DOL) provides the nationally recognized “Certificate of Completion” upon program completion. Visit United Services Military Apprenticeship Program (USMAP) for apprenticeships:

https://usmap.netc.navy.mil/usmapss/static/navyRates.htm

EARN INDUSTRY RECOGNIZED CREDENTIALS
Navy COOL catalogs and defines comprehensive information on occupational credentials - including certifications, licenses, and apprenticeships - correlating with every Navy rating and some collateral duties. It provides “how to” instructions for pursuing these credentials, links to credentialing organizations, and cross-references to programs that help Sailors pay for credentialing fees. Shortly following the initial rating technical training (Class “A” technical school), Sailors may be able to take advantage of earning civilian/industry certifications & licenses (credentials), funded through Navy COOL.

EARN SKILL SETS TOWARDS CIVILIAN RELATED OCCUPATIONS
The skill sets for this rating crosswalk to civilian related occupations listed by the U.S. Department of Labor. See Related Civilian, Federal and Military Sealift Command Occupations for this rating on Navy COOL.
