A-950-0001	NV-2202-0165 V04 Recruit Basic Military Training (BMT): This course provides students with the knowledge, skills, and abilities to become disciplined, physically fit, Basically trained sailors who are prepared for follow-on training. Students learn about standards of honor, courage, and commitment and follow a rigorous screening, education, training, and attitudinal development process.			
	- Basic Seamanship		2SH	L
	- Marine Safety		2SH	L
	- Personal Development		2SH	L
	- Physical Fitness		2SH	L

C-602-2026	NV-1704-0326 V05 Aviation Support Equipment Technician Class A1: Naval Air Technical Training Center Pensacola, FL			
	Upon completion of the course, the student will be able to understand fault isolation procedures; understand and apply proper equipment safety procedures; understand the use of special tools and equipment for the support of basic troubleshooting and maintenance; identify and replace defective system components; recognize and interpret malfunction system indicators; understand basic electrical components; describe safety precautions that apply to circuits; describe and understand electrical and wiring diagrams; install wiring in electrical circuits; isolate electrical faults; perform electrical measurements; perform system diagnostics; perform circuit troubleshooting and repairs; describe the sequence of operation of motors, generators, and transformers; troubleshoot motors, generators, and transformers; understand the purpose and use of electric motors, generators, and transformers; understand the principles of internal combustion engines; maintain and repair mechanical systems; explain procedures for testing internal combustion engine systems; identify operational characteristics of two-stroke diesel engines; maintain and tune two-stroke diesel engines; maintain hydraulic systems and lifting devices; describe fluid measuring equipment; describe hydraulic fundamentals; describe hydraulic jacks; explain hydraulic testing procedures; identify hydraulic seals; describe pumps, accumulators, and actuators; repair hydraulic systems; maintain mobile electric power plants; explain the sequence of operation of a mobile electric power plant; describe the procedures for troubleshooting mobile electric power plants; troubleshoot electric power plants; understand safety precautions associated with electric power plants; analyze basic AC and DC circuits; use test equipment to measure circuit parameters; apply basic transistor and diode concepts to electronic circuits; troubleshoot electrical and electronic circuits; and apply electrical safety standards to circuit analysis and repair procedures.			
	- Basic Electricity And Electronics		3SH	L
	- Electric Generator Plant Maintenance		3SH	L
	- Electric Power Distribution		3SH	L
	- Electrical And Electronic System Maintenance And Repair		1SH	L
	- Electromechanical System Maintenance		3SH	L
	- Hydraulic Systems		3SH	L
